

# INDUSTRIAL LED LIGHTS SYSTEM OPTIMIZED FOR YOUR APPLICATIONS

**PRODUCT  
CATALOG**

## ABOUT LIGHTING SYSTEM

AI.Rob's LED industrial lighting is suitable for a wide range of vision and industrial applications, such as inspection, identification, testing, machine vision and robotics. LED lighting features excellent light intensity and smooth illumination combined with a long lifetime. The AI.Rob product family is modular and can be used in various combinations to optimise lighting.

Different types of LED colours: green, red, blue, white or infrared, as well as the different types of diffusers mean that the light can be selected exactly according to the requirements of the application.

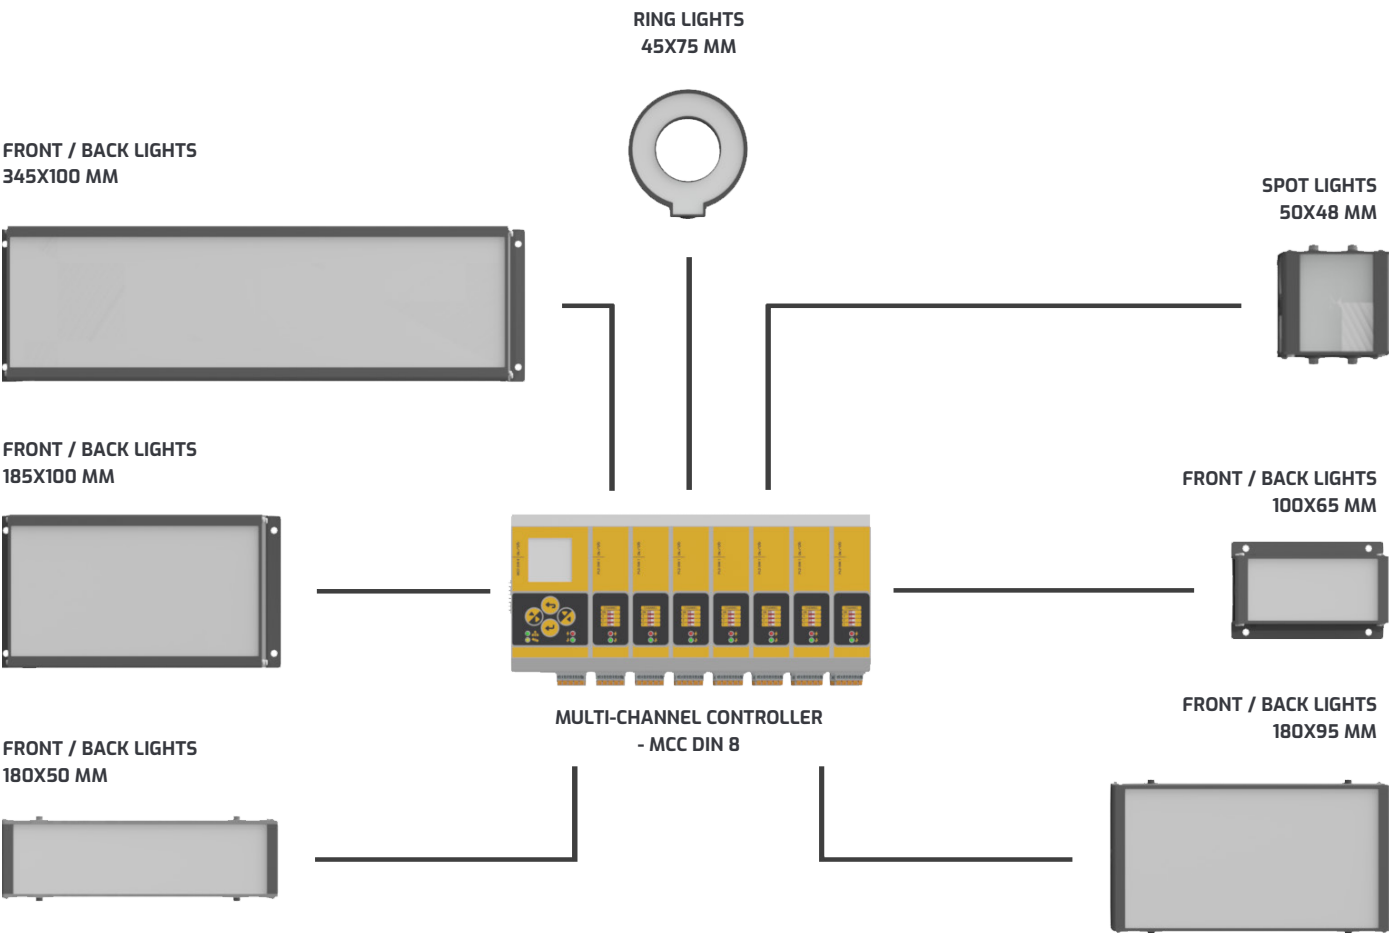

In addition to a range of standard products, we also make custom-designed LED arrays, lighting and control units. Customer-specific developments and adaptations are a core part of AI.Rob's business.

All lamps and controllers are designed for industrial applications. For this reason, they are delivered in solid aluminium housings. All lamps can be operated in continuous or strobe mode. The lamps are robust, compact and easy to install. Simply connect the LED light to the controller and set the desired light intensity.

# OUR LED LIGHTS FAMILY

## MULTICHANNEL CONTROLLER - MCC DIN 8

This unit is a comprehensive control device built for compatibility with standard LED lighting systems. Thanks to its modular design, the Multi-channel Controller - MCC DIN 8 provides independent, continuous control of up to eight LED loads with a continuous DC current of up to 5 amps and a maximum output power of 100 watts per channel.

Specifications	
Output channels	Max 8, independently controlled
Voltage Input	24 V DC +/- 10%
Voltage Output	3 V to 21 V
DC Current	30mA min to 5A max
Power Output	100 W per channel
Compliance	RoHs
Mounting	Din-rail
Controller Weight	235 grams
Module Weight	130 grams

# SPOT LIGHT

## 50X48 MM

- This highly powerful spot light, is your camera's best partner to get an optimized control, in continuous or strobe mode. This spot light is really appropriate wherever space is a real constraint.
- Compact and powerful
  - Illuminates objects at long distances
  - High quality electronic components from the best manufacturers
  - Continuous or strobe modes
  - Various types of diffusers

### ORDER INFORMATION

Diffuser information		
Replace „Y” in order number by one character*	Type	Transparency (%)
30	Satin	30
70	Satin	70
100	Clear	99

Order number of light: VIS1M1x2-R17-Y

\*Example for light with satin diffuser of 70% transparency: VIS1M1x2-R17-70

### CONNECTOR PINOUT

PIN	Meaning
1	V+
2	V-
3	NC
4	NC

### DIMENSIONS AND FIXING

### ENVIRONMENT

Parameter	Value
Operating temperature	0 - 40°C
Storage temperature	0 - 60°C
IP protection	IP 40
Labels	RoHS-CE-WEEE

## TECHNICAL SPECIFICATIONS

### MECHANICS

Parameter	Value
Dimensions of the lamp	50 x 48 x 20 mm
Weight (with cable)	60 g (90 g)
Body materials	Black anodized aluminium
Fixing	4 holes for M3 screws (included)
Cable length	900 mm

### ELECTRONICS

Parameter	Value
Functioning mode	Continuous or strobe
Nominal current – continuous mode	2 A
Maximum current – strobe mode	3 A
Nominal voltage	8,5 V
Nominal power	17 W
Maximum power	25,5 W
Wiring	Plug: M12; PIN: 4; male connector; A code, cable 900 mm
Power connector manufacturer	Amphenol
Power connector P/N	M12A-04BMMM-SL8D01
Power supply	Requires an external power supply

### OPTICS

Parameter	Value
Color	White
Number of LEDs	2
LED spacing on the module – pitch [horizontal]	17 mm
Size of the active light field	45 x 33 mm
LED Manufacturer	CREE
LED P/N	XPLAWT-00-0000-0000V30E2
LED color temperature	5700 K
Luminous flux for 1 LED	420 lm
Diffuser	YES

## FRONT / BACK LIGHTS 100X65 MM

This series of lamps can be used as a front or backlight. For front lighting, the best diffuser would be an acrylic clear glass cover or satin with 70% transparency. As a backlight settled under the objects to be controlled it highlights the objects' global shape, which enables the verification of possible material lacks and outlines defects.

- Front or back light
- Available in different colors: white, red, green, blue and infrared
- High quality electronic components from the best manufacturers
- Continuous or strobe modes
- Various types of diffusers

## ORDER INFORMATION

### Color information

Replace „X“ in order number by one character*	Color	Wavelength (nm)

# RING LIGHTS

## 45X75 MM

Essential when direct lens attachment is required, ring lights provide uniform and shadow-free illumination. This directive lighting is adapted to most cameras with an outer diameter of 45 mm lens. The Ring Light reveals all its potential in the field of robotics and machine vision. This Ring Light also perfectly goes along with a camera dedicated to quality control tasks e.g. code reading, presence/absence checking, surface control and more.

- Available in different colors: white, red, green and blue
- High quality electronic components from the best manufacturers
- Continuous or strobe modes
- Various types of diffusers

### Warranty

The warranty period of one year applies to all LED lamps and controllers under the following operating conditions:

**Operating temperature:** 0 °C to +40 °C

**Storage temperature:** 0 °C to +60 °C

**Relative humidity:** max. 80%, non-condensing

**Definition of a defect LED light:** An LED light is defect if the brightness drops to 50% of the original brightness.

**Warranty limitation:** Operation without the Ai.Rob controller voids the warranty!

Features and presentations liable to modifications without prior notice.
